

ABANOUB ASHRAF EZZAT ZAKI MICHAEL

Software Development Engineer

Karlsruhe, Baden-Württemberg, Germany | +49 152 1453 5320 | abanoub4055@gmail.com | [Github](#) | [Linkedin](#)

Summary

Software Development Engineer with 4+ years of specialized experience in Flutter and iOS development. Expert in building scalable mobile applications using clean architecture and modern state management patterns. Proven track record leading cross-functional teams, optimizing performance, and delivering high-quality, user-focused solutions across 10+ production applications.

Education

Alexandria University

B.S. in Computer and Systems Engineering | Grade: **87.6% (Excellent with degree of honor)**

Alexandria, Egypt

09/2016 - 06/2021

Skills

Technical Skills:

Flutter, Dart, iOS (Swift, SwiftUI), Clean Architecture, State Management (Bloc, Riverpod, Provider, Cubit), MVVM, VIPER, RESTful APIs, Firebase, Git, CI/CD (Codemagic), SQLite, Google Maps API, ARKit, OOP, Data Structures, Algorithms

Soft Skills: Leadership, Problem-Solving, Collaboration, Time management, Team management, Effective communication

Experience

Blink22

Dubai, United Arab Emirates

Full-time Software Development Engineer (Flutter and native iOS)

08/2021 - Present

Software Development Company

- Developed mobile applications using Flutter, implementing Provider and Bloc state management patterns.
- Applied clean Architecture for a scalable, maintainable app structure.
- Optimized performance across multiple Flutter & iOS projects, ensuring a high-quality user experience.
- Collaborated with cross-functional teams to achieve project goals and meet deadlines.

GLI Global Lean Industry 4.0

Dubai, United Arab Emirates

Software Development Team Leader (Flutter)

01/2022 - Present

Global Lean Industry

- Led a team of 6 developers across 5 concurrent Flutter projects, ensuring on-time, high-quality delivery.
- Refactored legacy codebases of the LeanGo Dashboard and LeanGo CIL applications, both built using Flutter.
- Reduced infrastructure costs by 30% through efficient resource allocation in Firebase services.
- Achieved a 75% bug reduction through continuous testing and feedback loops.

Blink22

Alexandria, Egypt

Mobile Development Internship (iOS)

07/2020 - 09/2020

Software Development Company

- Developed an image tracking application using ARKit, allowing users to add product names, descriptions, and images, and display recognized products.
- Contributed to various iOS applications using Swift and VIPER Architecture for improved scalability and collaborated with senior developers to implement new features and improve the functionality of mobile applications.

ITSpark

Alexandria, Egypt

Mobile Development Internship (Flutter)

07/2019 - 09/2019

Software Development Company

- Converted an online pharmacy app from native Android to Flutter cross-platform and resolved some issues on the Android version.
- Worked on a Flutter online market application allowing users to order from home.

Projects

LeanGo Platform Apps

01/2022 - Present

Software Development Team Leader (Flutter)

- Leading the software development of all LeanGo Platform apps like LeanGo Dashboard, LeanGo CIL Android, LeanGo CIL iOS, LeanGo MES Android, LeanGo MES iOS, LeanGo Trace Android, LeanGo Trace iOS.
- Built and developed all platform apps from scratch. Achieved successful launches on both the Google Play Store and Apple App Store.
- Developed the LeanGo Dashboard Web App using Flutter Web.
- Enhanced accessibility across web and mobile while optimizing for different screen sizes.
- Delivered scalable, maintainable, and high-performance solutions to meet business objectives.
- Streamlined development processes and ensured on-time delivery by effectively managing a cross-functional team.

Projects

Salik

02/2025 - Present

iOS app using SwiftUI

- Contributed to the development of the Salik app for the UAE government, focusing on implementing features in SwiftUI using MVVM and clean architecture.
- Worked on key models, including Transactions, Vehicles, Services, Settings, Profile, and News, ensuring seamless integration and functionality.
- Delivered high-quality code following best practices, ensuring app stability and performance.
- Collaborated with cross-functional teams to align the app with business and government objectives.
- Contributed to various minor but essential enhancements to improve overall user experience and application efficiency.

SALT

03/2022 - 09/2022

Project Lead using Flutter

- Led the development team from project inception to production deployment, building the Salt.one app using Flutter.
- Defined and implemented a robust development workflow, including CI/CD tools, state management patterns, modular file architecture, and adherence to clean code conventions.
- Developed key features such as the Buy and Sell Gold module, enabling secure and seamless transactions for users.
- Implemented and integrated a chat module powered by AI, helping users track expenses and improve financial habits.
- Built the investment module for purchasing mutual funds, providing users with a comprehensive investment experience.
- Collaborated with cross-functional teams, ensuring timely delivery of a high-quality application aligned with business goals.

IRIS

10/2023 - 11/2024

Flutter app

- An application for reviewing loan applications for small businesses and shops.
- Worked on setting different development environments like dev and prod using flutter flavors.
- Enhanced the CI/CD process using the code magic CI/CD tool.
- Developed many key features inside the verification process.

LIBRA

10/2022 - 05/2023

iOS app using Swift

- Worked on implementing VoIP calls inside the app from one user to another handling all edge cases related to VoIP calls.
- Worked also on the invite a friend module using a text message or using a QR code.

Khatabook

01/2022 - 09/2022

iOS app using Swift

- A business management app built with iOS using VIPER structure and Swift language.
- Worked on adding the transfer and receive money among users module through a real and secure bank transfer.
- Worked on the transaction status and transactions history screens.

ResQ

02/2020 - 03/2020

Android app using MVC architecture

- Developed an application that assists stray animals, allowing users to find lost pets or put pets up for adoption using Google Sign-In API and Firebase.

Key Achievements

IRI Hackathon 2019

Achieved 1st place in IRI Hackathon in Egypt with the Haky Shoyyab app.

Google DSC Solution Challenge 2020

Qualified as one of the best 13 teams in the MENA region to the semi-final round of the Google DSC Solution Challenge 2020 with ResQ app.

Volunteering

Alexandria University, Faculty of Engineering CSED

Vice Representative of My Class

09/2018 - 06/2019

Organized activities related to my class with teachers and teacher assistants.
