ABANOUB ASHRAF EZZAT ZAKI MICHAEL

Software Development Engineer

Baden-Württemberg, Germany | +49 152 1453 5320 | abanoub4055@gmail.com | GitHub | LinkedIn | Portfolio

Summary

Software Development Engineer with 5+ years of professional experience in Flutter and native iOS development. Expert in building scalable mobile and web applications using clean architecture and modern state management patterns. Proven track record leading cross-functional teams, optimizing performance and infrastructure costs, and delivering high-quality, user-focused solutions across 30+ production applications. Uses AI coding agents such as Claude Code and Codex daily to accelerate delivery while maintaining code quality.

Skills

Technical Skills: Flutter, Dart, iOS (Swift, SwiftUI), Clean Architecture, State Management (Bloc, Riverpod, Provider, Cubit), MVVM, VIPER, RESTful APIs, Firebase, Git, CI/CD (Codemagic), SQLite, Google Maps API, ARKit, OOP, Data Structures, Algorithms

AI-Assisted Development: Claude Code, OpenAI Codex, AI coding agents for daily development, refactoring, code review, debugging and test generation

Soft Skills: Leadership, Problem-Solving, Collaboration, Time Management, Team Management, Effective Communication

Languages: Arabic (Native), English (Proficient, C1), German (Elementary, A2)

Experience

Blink22
Dubai, United Arab Emirates

Full-time Software Development Engineer (Flutter and native iOS)
08/2021 - 11/2025

Software Development Company

- Developed Flutter apps with Provider and Bloc, and native iOS features in Swift and SwiftUI using MVVM, VIPER and clean architecture, including a UAE government app.
- Optimized performance across multiple Flutter and iOS projects.

GLI Global Lean Industry 4.0
Dubai, United Arab Emirates

Part-time Software Development Team Leader (Flutter)
01/2022 - 11/2025

Global Lean Industry

- Led a team of 10+ developers across concurrent Flutter projects.
- Owned architecture and development workflows for the LeanGo platform: 10+ Industry 4.0 apps on Android, iOS and web.
- Refactored the legacy LeanGo Dashboard and LeanGo CIL codebases.
- Reduced infrastructure costs by 30% through efficient Firebase resource allocation.
- Achieved a 75% bug reduction through continuous testing and feedback loops.

Wellx AI
Dubai, United Arab Emirates

Contract Software Development Engineer (Flutter)
Contract · 07/2025 - 09/2025

AI-Powered Health Insurance

- Worked on Wellx, an AI-powered health insurance app that uses behaviour and well-being data to make coverage proactive rather than reactive.
- Built the emotion-tracking module and the tracked-emotions statistics screen in Flutter.

Blink22
Alexandria, Egypt

Mobile Development Internship (iOS)
07/2020 - 09/2020

Software Development Company

- Developed an ARKit image tracking app for product recognition.
- Contributed to iOS apps using Swift and VIPER.

ITSpark
Alexandria, Egypt

Mobile Development Internship (Flutter)
07/2019 - 09/2019

Software Development Company

- Converted an online pharmacy app from native Android to Flutter.
- Worked on a Flutter online market app.

Education

Alexandria University — Alexandria, Egypt

B.S. in Computer and Systems Engineering — 09/2016 - 06/2021

Grade: 87.6% (Excellent with degree of honor)

Projects

LeanGo Platform

Software Development Team Leader (Flutter) — 01/2022 - Present

- Leading development of a full suite of 10+ Industry 4.0 manufacturing apps: LeanGo Dashboard, STM Dashboard, STM Mobile (Android, iOS), CIL (Android, iOS), MES (Android, iOS), Trace (Android, iOS), HACCP, ARTEX engage.
- Built all platform apps from scratch and shipped them to Google Play, the App Store and the web, covering analytics, maintenance, traceability and food safety.
- Built the LeanGo and STM dashboards with Flutter Web, with shared architecture, CI/CD, and responsive, accessible UI.

Salik

iOS app using SwiftUI — 02/2025 - 03/2026

- Contributed to the Salik app for the UAE government, implementing features in SwiftUI using MVVM and clean architecture.
- Worked on key modules including Transactions, Vehicles, Services, Settings, Profile, and News, meeting government-grade quality standards.

Memo Rush

Personal project using Flutter — 11/2025 - 01/2026

- Designed, developed and published an emoji card-matching memory game on the Google Play Store, end to end and solo.

MUAB

Flutter app (Education) — 04/2023 - 12/2023

- An education ecosystem and social learning network with a personalized, AI-driven feed.
- Built the login, home content feed, explore (user and post search), and user profile screens, plus the block-users feature.

LIBRA

iOS app using Swift — 10/2022 - 05/2023

- Implemented user-to-user VoIP calls inside the app, handling all related edge cases.
- Built the invite-a-friend module using text messages and QR codes.

SALT

Project Lead using Flutter — 03/2022 - 09/2022

- Led the development team from project inception to production deployment, building the Salt.one app using Flutter.
- Defined the development workflow, including CI/CD tools, state management patterns, modular file architecture, and clean code conventions.
- Developed the Buy and Sell Gold module, the mutual fund investment module, and an AI-powered chat module that helps users track expenses.

Khatabook

iOS app using Swift — 01/2022 - 09/2022

- A business management app built with Swift using the VIPER architecture.
- Built the module for sending and receiving money between users through real, secure bank transfers, plus transaction status and history screens.

Key Achievements

Google DSC Solution Challenge 2020

Qualified among the best 13 teams in the MENA region for the semi-final round with the ResQ app.
